

COOL Time

COOL time stands for, 'continuing our own learning'. During COOL time, we use what we have learned during the week or things we have enjoyed, to inspire us to continue our own learning independently in a range of creative ways.

Here are some ideas to help inspire you when you have finished your lessons!

Rocket Junk modelling

Using used materials such as a washing up bottle or old cardboard to create a rocket. Decorate it by painting or using craft materials.

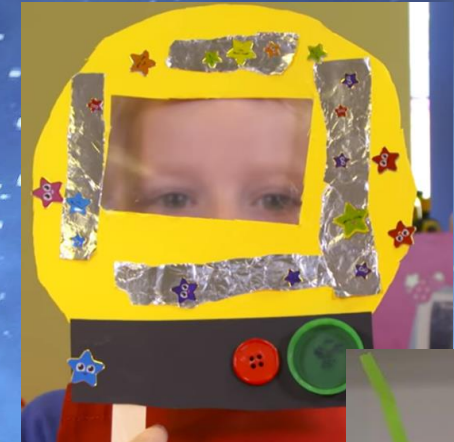

Chalk Art

Use chalks or pastels to create a solar system picture.

Shape Aliens

Cut out different 2D shapes from coloured card or paper and stick them together to create a funny alien picture.

Role Play Masks

Create an alien or astronaut mask or headband to retell your favourite Space themed story.
