

The Hungry Wolf Game

You will need:

The Hungry Wolf sheet

10 counters or objects

2 dice

How to play:

Beat the hungry wolf!

Take 10 counters per person.

Roll the two dice and add the dots together.

Place a counter on that numeral. If there is one there already, take it away.

If you throw a total of 7, the counter goes inside the wolf's tummy and can't be removed!

The winner is the person with the most counters left when everyone else has lost all of theirs.
