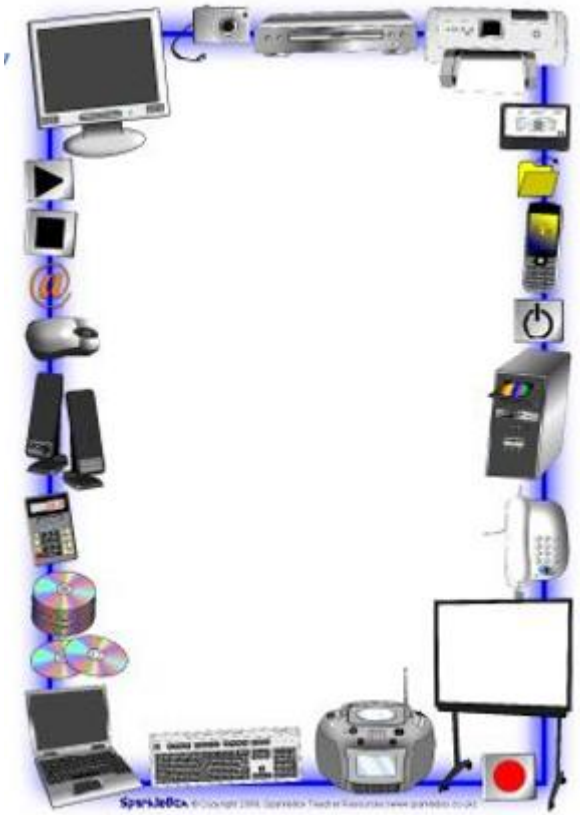
Talk about what the internet is-it is something you can go on on a computer or device to do many things- the shopping, play games, find out information, read books, listen to songs and see videos.

Explore something fun and safe together,

Create a poster together about things you should and shouldn't do in order to keep safe on the internet.



What should you do if you see something you don't like?

Tell your child they must never go onto the internet without an adult. This is to keep them safe from things they may not like.
